

ANNUAL REPORT 2023

HOPE

As I reflect on the past year, I am grateful for the significant growth and impact of our programs due to your continued support.

We have been privileged to bear witness to countless inspiring stories of resilience, hope and restoration. Among many noteworthy highlights of this year, one achievement stands out in particular: the successful completion of phase 1 of the Mistletoe Clinical Trial. This monumental milestone marks the first step towards mistletoe therapy becoming part of standard of care oncology and being covered by insurance. We are already in discussions in designing phase 2 as we actively raise the 1.5 million dollars needed to begin.

As you read this year's annual report, you too will be filled with hope and optimism for the future. Together, we continue to build a strong foundation in helping those who are facing, fighting, and overcoming cancer. Thank you for being an integral part of Believe Big.

With heartfelt appreciation,

Ivelisse Page,

Executive Director & Co-Founder

Believe Big & The Believe Big Institute of Health

OUR FOUNDERS

After facing, fighting, and overcoming stage IV colon cancer, Ivelisse Page wanted to reach out to other patients facing the many challenges she encountered through her cancer journey. After assembling a team of doctors and accumulating extensive research, Ivelisse and her husband, Jimmy, compiled reliable resources to heal the whole person physically, spiritually, mentally and emotionally. They established Believe Big in 2011 to help families bridge the gap between conventional and complementary medicine for fighting cancer.

OUR VISION

To see cancer patients and their families discover their pathway to healing.

OUR MISSION

To help families face, fight, and overcome cancer.

OUR FOCUS

- Educate individuals on a comprehensive approach to cancer prevention and treatment.
- Connect patients with physicians trained in mistletoe therapy, oncology nutritionists, and the resources necessary to help them advocate for their own health.
- Provide spiritual support to help patients and their families overcome fear and anxiety.
- Overcome cancer with the development of The Believe Big Institute of Health and supporting the ongoing phases of the Mistletoe Clinical Trial in collaboration with The Johns Hopkins University School of Medicine.

CORE VALUES

FAITH

*"We believe it
before we see it."*

TEAMWORK

"We are better together."

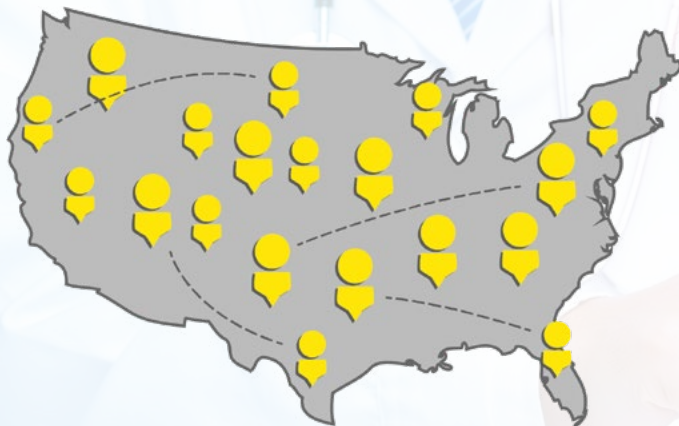

INTEGRITY

*"We do the right things
for the right reasons."*

COMPASSION

*"We love, care,
and serve."*

OUR NETWORK

We connect patients with physicians trained in mistletoe therapy, oncology nutritionists, and the resources necessary to help them advocate for their own health.

When we began in 2011 we only had two physicians we could direct patients to for mistletoe and nutrition therapy.

Today we have a network of over 71 practitioners.

PHASE II CLINICAL TRIAL

Help Make Phase II a Reality!

In the United States, most clinical trials are funded by pharmaceutical companies, which have vested interests in bringing a new drug to market. Unfortunately, it's challenging for remarkable therapeutic substances like mistletoe to undergo rigorous study. Only through our collective efforts can we make this a reality. Last year we celebrated the completion of Phase 1. However, there is more to be done. I have been in discussions with Johns Hopkins and researchers in Germany regarding the design of phase 2. BUT, in order to even begin any phase 2 trial, we need to raise \$500,000 of the estimated 1.5 million dollars needed for phase 2. To date we have raised \$117,000 of the \$500,000.

See the latest updates here:

www.believebig.org/clinicaltrial

Nutrition + Mistletoe Grants

Through our grant programs, we approved over 400 grants valued at \$107k. These grants were distributed across various key areas: 277 were allocated for consultations, ensuring recipients had access to integrative medical care and support; 102 were specifically for mistletoe IV treatments; 20 focused on nutrition, supporting the health and dietary needs of our beneficiaries; and 1 special grant was awarded to address a unique and critical need.

"I Have Cancer, Now What?"

VIDEO SERIES

The problem that most cancer patients are experiencing.

Once diagnosed, patients:

- Are immediately rushed on a conveyor belt of treatment with only three options: chemo, radiation, and surgery.
- Don't realize that their care should be individualized and not standardized.
- Don't think they have time to investigate other options not knowing that it typically takes cancer seven to ten years to grow in the first place.
- Are so overwhelmed with just being diagnosed that they aren't sure of what questions to ask or that there is a better way where they can complement treatments and have a great quality and quantity of life.
- Are trying to figure out how they are going to be able to sustain their family financially.
- Hear the word cancer, and they are instantly filled with fear as the only picture they see in their mind is of someone who is suffering and weak.

We created this video series as a solution to the overwhelm patients feel once diagnosed.

This video series will help walk patients and their families through an easy step-by-step process on what to do once diagnosed. There are five short lessons with downloadable resources attached to each one.

1. Overcoming The Shock
2. Build Your Treatment Team
3. Build Your Support Team
4. Tools for A Strong Mindset and Emotions
5. A Healthy Soul

Register today to watch the series by using the following link:

www.believebig.org/patientportal

**This video series and all of Believe Big's resources and services are free to patients due to the generous donations of our supporters. If you would like to contribute and join our vision to see cancer patients and their families discover their pathway to healing, please donate by visiting www.BelieveBig.org/donate.

GIVING TESTIMONY

Pictured L-R: Daniel Kelly, Jacob Kelly, Celeb Kelly, Heidi Kelly, Bryan Kelly, Eli Kelly, and Joshua Kelly

The Kelly Family

Today, as a family, we come before you with heavy hearts, knowing all too well the pain and uncertainty that comes with a cancer diagnosis. We've stood by the bedside of dear friends and cherished family members as they faced this formidable foe, feeling helpless in the face of their suffering.

Through these experiences, we've witnessed the transformative power of organizations like Believe Big. They don't just treat cancer; they provide holistic support that heals the body, mind, and spirit. Serving as the board chair of Believe Big has been an honor for our family, allowing us to witness firsthand the incredible impact of their work.

As parents, we're driven by a deep desire to create a brighter future for our children—one where cancer is not a looming threat but a conquerable challenge. We dream of a world where every cancer patient has access to the tools and resources they need to navigate their journey with hope and dignity.

We envision communities coming together to support those battling cancer, offering comfort and strength in their time of need. And we're committed to doing our part to make this vision a reality.

**That's why we invite you to join us in supporting Believe Big.
Together, let's spread hope and healing to those who need it most.**

BELIEVE BIG INSTITUTE OF HEALTH

The Believe Big Institute of Health will be a culmination of searching worldwide for innovative oncology assessment and treatment. Though integrative oncology programs do exist in academic institutions around the country, Believe Big has seen through the years how they fall short of offering a truly integrative approach that can change cancer outcomes. We are in the beginning stages of creating an institute of health where health-minded individuals will come for a full evaluation to prevent a cancering process and cancer patients can find everything they need to heal in one place.

We are a warm and inviting Christian community that will welcome guests of all faiths, backgrounds, and gender identities. We are respectful of each person's beliefs, while at the same time, being true to who we are.

Wellness Innovation / Mind, Body & Soul

- Health minded individuals will be able to come for a wellness retreat, to gain valuable insight into their metabolic state, and go home with an effective plan to help them thrive
- Wellness cafe offering therapeutic cooking classes
- Luxury spa and non-toxic aesthetic medicine
- Prevention of disease and enhancement of longevity through biohacking with therapeutic nutrition, targeted movement and physical fitness, biofeedback, hot and cold conditioning, and light therapies
- Personalized wellness programs including genetic testing, clinical laboratory evaluation, acupuncture, chiropractic care, personal training, and more
- A conducive environment to quiet one's spirit, leave the demands of daily life, and be free to seek and deepen a spiritual connection with Christ

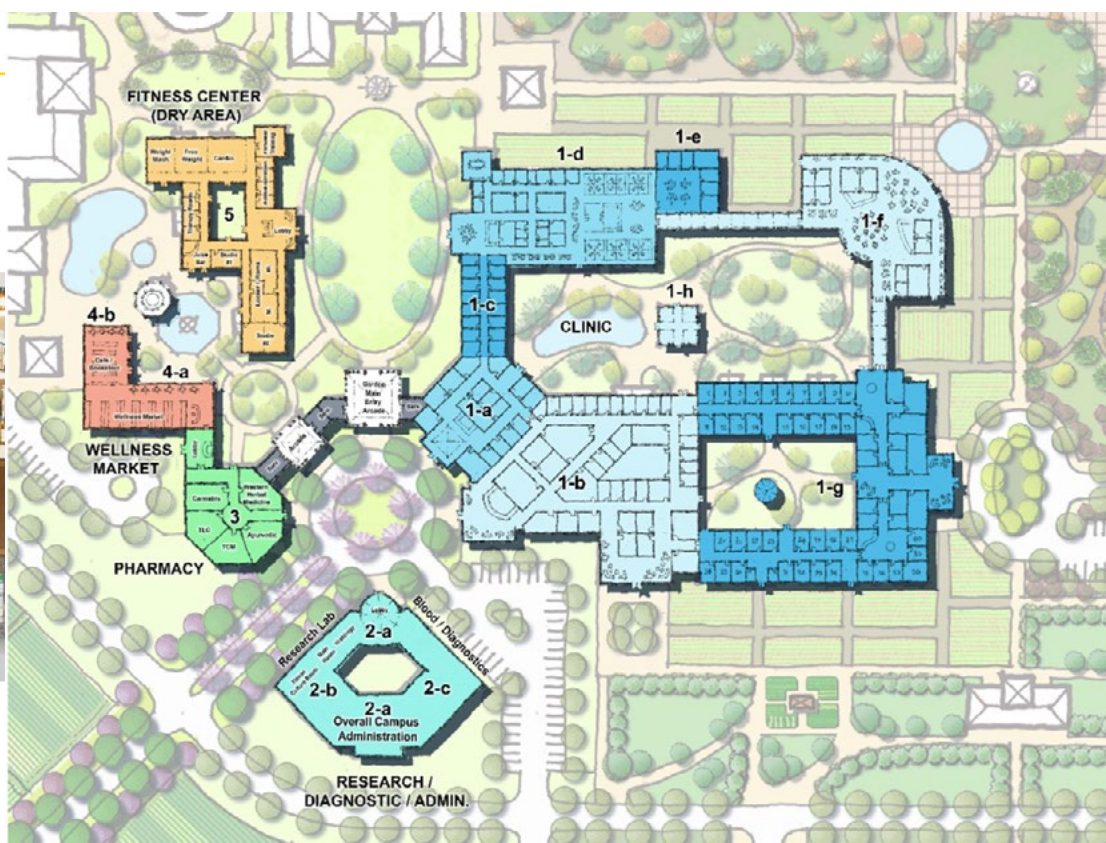

Patient Care

We exist to upgrade the "standard of care" for cancer by moving from the trial and error approach inherent in set protocols:

1. EVALUATE - Before undergoing any treatment, we assess patients' complete biomedical workup, epigenetic blueprint, personal and family history, and lifestyle influences that contributed to or are driving their disease process.

Right: A small portion of the proposed development plans.

2. TRANSLATE - Our unique ability to translate this information can take the guesswork out of treatment and guide patients to use the correct medications and interventions at the right time throughout their treatment.

3. TREAT - Patients will have access to vetted and research-supported therapies along with re-envisioned standard of care in one place.

4. INFORM - The data and analytics from our research will provide scientific evidence to inform cancer treatment for practitioners and patients well beyond our walls.

Our Mission: To stop cancer from stopping you.

Our Vision: A world where cancer creates an opportunity and invitation to heal.

Currently The Believe Big Institute of Health is a virtual network of practitioners working together to deliver this approach to treatment and prevention. Visit Believe Big's growing list of practitioners to gain access to this care now while we bring the physical campus to life.

STORIES OF HOPE

BEN ABELL

**STAGE IV
COLON CANCER**

I was diagnosed with a very aggressive stage IV, Gleason scale 9 out of 10, prostate cancer that had metastasized to my arm. For some of us, that diagnosis brings shock. How in the world could this happen to me? As a follower of Jesus Christ, I knew I needed to first go to him and go to his word.

My wife and I decided to grab a set of verses to carry us through this journey. So we picked Philippians 4 and experienced the promises of these verses. It says, "Don't worry about anything. Instead, pray about everything. Tell God what you need and thank him for all he has done. Then you will experience God's peace, which exceeds anything we can understand. His peace will guard your hearts and your minds as you live in Christ Jesus."

As we pressed into these verses and promises, we began to see God orchestrate through friends and connections a holistic, integrated, world-class care team. Our healing journey began with the wisdom and direction from the John Hopkins team, who encouraged us by saying they wanted to go for a cure.

It also included the amazing team from Believe Big, with their helpful, encouraging, practical, and hope-filled resources. These resources connected me to an integrative practitioner who developed a tailor-made comprehensive protocol for my healing. Along with traditional medical and integrative treatments, I've included consistent exercise in my weekly rhythms and received invaluable prayer support.

As of today, my PSA has been undetectable for the last five quarters, and I feel healthier and stronger than ever before. Words can't express how thankful I am for my entire care and support team, my whole family, and particularly my wife, Laura, who has walked every step of the way with me on this journey.

The caregivers are the heroes. One incredible resource is a book called Radical Hope. In that book, there's research on thousands of people who have gone into remission, and there are ten practices each of them had been doing, one of them being a reason to live.

So I conclude by sharing a picture of my family, all 20 of us after my 33rd round of treatments of radiation in my pelvic area. It was the only day all year long that all of them could have been together on December 29th to help me ring the bell.

Friends, if you've invested in Believe Big in the past, I want to say thank you because what you gave has helped my personal healing journey. For all of us, I encourage you to consider giving a generous gift to Believe Big. They are doing magnificent work and are worthy of our investment.

Two years ago, in the quiet hours of the night, I found myself at a crossroads. Diagnosed with stage III colon cancer, conventional treatments were not an option due to my compromised immune system. Yet, fueled by my will to live and the desire to see my grandchild grow up, I embarked on a journey in search of hope.

As I scoured the internet, I stumbled upon stories of resilience and triumph shared by fellow cancer survivors. Their courage ignited a spark within me, a determination to overcome. I made a promise to myself and to those around me that I would stand before them one day, sharing my own story of victory.

So there I sat at my kitchen table, having just undergone surgery to remove a significant portion of my colon and over 60 lymph nodes. But I was determined, driven by a fierce resolve to beat this disease.

With the unwavering support of Believe Big, I found guidance and strength. From connecting me with knowledgeable advocates to facilitating access to alternative treatments, Believe Big became my beacon of hope in the darkest of times.

Today, as I hold clear CAT scan results in my hands, I am reminded of the power of faith and community. I am alive because of the dedication and sacrifice of those who championed my cause.

To you, dear reader, who may be facing a similar battle, I offer these words of encouragement: there is hope. Believe Big embraced me in my hour of need, and I am confident they will do the same for you.

In closing, I share a scripture that has brought me solace and strength on this journey: Psalm 40. "I called to the Lord, and He heard my cry. He lifted me up out of the pit, and He set my feet on solid ground. He put a new song in my mouth, and many will hear it and be glad."

Thank you, Believe Big, for being a vital part of my story. And to you, reader, I extend my heartfelt wishes for courage and healing.

COLON CANCER**

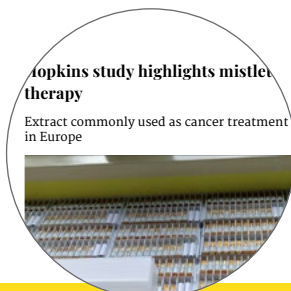

2023 HIGHLIGHTS

Helixor Conference in Ecuador

Believe Big was invited to be a part of the Integrative Medicine Meeting in Quito, Ecuador! We joined physicians from all over South America learning the latest research and practices of mistletoe and other complementary therapies. Dr. Paller from Johns Hopkins participated remotely and shared the research results of the mistletoe trial and other natural product trials she investigated. Ivelisse shared her story and for the first time in Spanish!

Trial Published

The Phase I Trial of Intravenous Mistletoe in collaboration with Johns Hopkins School of Medicine was published! The conclusions from the trial deemed that Mistletoe improved a patient's quality of life and is safe. The recommended Mistletoe dosage was also determined via the trial. Overall, the trial results warranted doing a Phase II Trial, a significant accomplishment! Visit BelieveBig.org to read the results, John Hopkins Press Release, and ours!

Believe Mugs

Our Believe Mug program reached new heights, engaging the community through the arts and spreading joy and inspiration. Over the course of the year, we successfully sent out 545 painted mugs and hosted 35 painting events, including 14 innovative Mugs2Go sessions, 18 collaborations with local businesses, churches, and camps, and 3 events with various community groups. In total, 641 mugs were lovingly painted, each serving as a symbol of hope and connection.

FUNDRAISING EVENTS

FUNDRAISING DINNER

We held our 12th Annual Fundraising Dinner and the event was the first in-person event for Believe Big in over two years. Attendees were excited to be back together for a night of inspiring stories and updates on the latest advances in cancer research. Jennifer Gilbert St. John served as the Master of Ceremonies, and guests were inspired by the stories of hope shared by Terri Zgorski and Daniel Wellington. We are so grateful for our supporters who came alongside us to help cancer patients face, fight, and overcome their disease. Since Believe Big began we have helped over 1 million people due to your generosity.

Pediatric Cancer Support

Providing grants aimed at supporting pediatric cancer, we recognize the unique challenges young patients and their families face. We have developed a series of resources that guide parents through their child's cancer journey, offering both emotional and practical assistance. Our patient advocates play a crucial role in this process, working closely with families to navigate the complexities of treatment and care.

Ivelisse Overcomes 2nd Cancer Diagnosis

Because of her health practices and close monitoring, due to her Lynch Syndrome, it was found at the earliest stage possible (stage 1A endometrial). Unlike her first diagnosis, she witnessed firsthand the immense impact Believe Big has on patients navigating their cancer journey with all its resources and network of physicians. She walked in peace instead of fear. This experience led her to see how vital our emotional and spiritual health are to our physical health. Believe Big has now added these vital tools as free resources to others.

Our 1st Development Director

As our first Director of Development, Rebecca brings a deep personal commitment to enhancing our patient resources. Her mother's cancer journey and the hopeful legacy left by her mother fuel her dedication. Rebecca's story is a powerful reminder of our core belief: while not everyone may be cured, there is a path for everyone to be healed.

END OF YEAR FUNDRAISER

At the close of every year we hold an end of the year fundraiser online. We celebrated milestones and shared a variety of patient stories. We encouraged supporters to become a "Hope Giver" by donating and supporting cancer patients with their monthly donations. At Believe Big we imagine a future where cancer is no longer a death sentence and patients can easily find the treatments they need. For Ivelisse, breaking the cycle of cancer in her family was a personal victory. And because of that, hundreds of others have too.

Together, we can continue to make a difference in the lives of cancer patients and their families.

PATIENT & FAMILY THANK YOU NOTES

Dear Believe Big,

I want to say thank you for the help you've given me. I feel so grateful that my friend told me about your organization.

I received the most wonderful phone call from Jackie Guidera and was so uplifted after she prayed for me. I could feel how much she cared. And, I could tell that she is truly filled with the Holy Spirit.

You issued a grant to help pay for my mistletoe therapy consultation. Although I have not pursued that therapy, I gleaned some great information from the meeting that has been helpful to me.

We are so lucky to have you as a resource in Baltimore. I feel such appreciation for you and what you do. Many, many thanks.

With Gratitude,
Tina B.

Thank you all for the most thoughtful gifts you sent to my family for Christmas. We certainly appreciate just being remembered. You made an otherwise difficult time much more tolerable. Ronisha was such a "holiday" person. The Christmas ornament was so special. We hung it where everyone could see it. Again thanks for all of the gifts!
Ronald & Pamela M.

Rob would like me to thank y'all for the BELIEVE mug. How incredibly thoughtful. Out of all the help we've encountered on this journey the biggest comfort and encouragement are the prayers we've received. I actually remember decorating mugs for the Believe Big organization years ago at church. There's nothing quite as powerful as the power of prayer. Thank you all for praying on Rob's behalf.

Oh my goodness, I received the most thoughtful gift in the mail yesterday evening! It brought tears to my eyes. I can't wait to enjoy my daily teas in the beautiful mug.

Every morning, I start my day with prayer, and it was so nice to incorporate the "50 Days of Hope" this morning. You all know exactly how to support and help people on this journey.

I received my mistletoe order in the mail over the weekend and successfully administered my first injection! I also just received some blood test results this morning that Dr. Clark from NatureMed had ordered so I think that will be really helpful in fine-tuning my supplement list and dosages.

I can't tell you how amazed I have been about the Believe Big organization. You all have created something truly remarkable, and I am so incredibly grateful.

Many thanks,
Kelly A.

WE ARE PRAYING FOR YOU

You have chosen me and have not rejected me. So I will not fear for you are with me. I will not be dismayed, for you are my God. You will strengthen me and help me; you will uphold me with your righteous right hand....For you are the Lord, my God, who takes hold of my right hand and says **"Do not be afraid; I will help you."** - Isaiah 41:9-13
